From, Lisa Riebe, award winning author of *The Arrival*, comes the second title in the Pond Punkies' series.

It's Jimmy Neutron joins the X-Men – only they're green!

The Unearthing continues the story of Blaze, a young Larissan Pond Punkie who saved Earth from destruction, as he seeks to find his sister and save her from the monsters in his dreams.

Many times young readers are reluctant to finish a story because of how many words are on the page. Intimidation sets in and they close the book. The Pond Punkies' series are intentionally printed in a larger font and to really capture the struggling reader's attention, there are eighteen to twenty full page illustrations in each book.

To further encourage the reading process and help teachers along the way, the Pond Punkies' website www.PondPunkies.com has a Primary Level Study Guide, an Intermediate Level Study Guide, a memory game, crossword puzzles, word search, and more.

Lisa Riebe is a homemaker by day, writer by night, and the mother of a teenage son. She is also the author of *Pond Punkies - The Arrival* and *Pond Punkies – The Departure*. She lives with her family in Illinois. For more information about Lisa and the continuing adventures of Pond Punkies, visit www.PondPunkies.com.
